

SUMMARY

Computer Science Engineering student with experience in **frontend and full-stack development**, with a growing focus on **AI, DevOps, and Cloud Computing**. Interested in leveraging modern AI technologies and generative AI tools to build intelligent, scalable, and automation-driven applications. Currently developing skills in **backend development, CI/CD pipelines, Docker, Linux, cloud infrastructure, and infrastructure automation**. Passionate about exploring emerging AI technologies, integrating AI capabilities into software projects, and applying automation to improve development workflows, system reliability, and deployment efficiency.

EDUCATION

B.Tech in Computer Science and Engineering — Pimpri Chinchwad University, Pune

Aug 2023 – Jun 2027

CGPA: 8.4/10

SKILLS

Languages: Java, Python, SQL, JavaScript

Frameworks / Web: React, Node.js, Express, Flask, HTML, CSS, Tailwind CSS

Databases: MySQL, PostgreSQL, Supabase

Tools / DevOps: Git, GitHub, VS Code, Linux, Docker, Kubernetes, Figma, CI/CD

AI & Security: Google Gemini AI, OpenAI API, OTP & bcrypt Authentication, Cybersecurity, REST API Design

EXPERIENCE

Python Fullstack Developer Intern — Infosys | Jul 2026 – Sep 2026

- Led the intern team building a Python-based finance application across 8 core modules: expense, goal, budget, report, notification, portfolio, profile, and AI-assisted workflows.
- Followed a structured sprint cycle covering requirements, design, testing, and deployment with Git-based version control and code reviews.

Data Science Master Intern — EduSkills | AICTE | Oct 2024 – Dec 2024

- Performed end-to-end data cleaning and exploratory analysis on an IoT sensor-based dataset using Python, Pandas, NumPy, and SQL.
- Built regression, classification, and clustering models with Scikit-learn; visualized findings with Matplotlib and Seaborn.

Cybersecurity Intern — EduSkills | AICTE | Palo Alto Networks | Feb 2025 – Jul 2025

- Completed 7 hands-on labs on NGFW (Next-Generation Firewall) configuration, intrusion detection/prevention, and threat mitigation; scored 80% in the final assessment.

PROJECTS

FinSight Enterprise — Full-Stack Financial Intelligence Platform | Aug 2026

React 18 | Node.js | Express | Python Flask | Google Gemini AI | Tailwind CSS

- Built a full-stack financial platform with dual Express + Flask backends and 18 REST APIs across 8 modules (expense, goal, budget, report, notification, portfolio, profile, AI).
- Integrated Google Gemini AI for receipt/invoice OCR (parsed 8 of 10 formats in testing); implemented OTP-based authentication, bcrypt hashing, and secure session management.

Smart City Resource Optimization System — Winning Project, Samsung Innovation Campus | Mar 2026

Python | Scikit-learn | Graph Algorithms | Flask

- Built a hybrid ML + graph-algorithm platform covering three modules: healthcare (disease outbreak prediction), water (intelligent distribution with leak detection), and waste (dynamic routing).
- Won the competition among 80 teams at the Samsung Innovation Campus hackathon.

API Document Generator — Top 10, College Project Competition | Dec 2025

React | Node.js | OpenAI API | HTML/CSS

- Built a React-based API documentation tool with automatic duplicate-endpoint detection using Node.js and the OpenAI API; ranked top 10 in a college-level project competition.

CERTIFICATIONS

Claude Code 101 — Anthropic (Jul 2026)

Mastercard Cybersecurity Job Simulation — Forage (Jul 2024)

AWS Academy Cloud Foundations (May 2024)

Oracle Cloud Infrastructure (Aug 2024)

Getting Started with Artificial Intelligence — IBM (Sep 2024)

Red Hat Application Development I: Java EE, AD183 (Jul 2025)
